J2 / PLAYER EVALUATION

WISCONSIN HERD

JORDAN LATHON

6’5" GUARD / DEFENSE / GUARD REBOUNDING / CONNECTIVE PLAY

THE POSSESSION-WINNING GUARD

Physical point-of-attack defense, completing stops on the glass, and creating the next advantage for teammates.

10-26	107.1	114.2	-5.4 NET
2025-26 RECORD	PPG	OFF RTG	NET RTG / 28TH

01 / TEAM FIT

Wisconsin scored 107.1 PPG in 2025-26, the lowest mark in the league. A low-usage guard could help secure possessions and create cleaner looks without requiring scoring opportunities away from established guards.

02 / CURRENT ROTATION

Opening roster guards: Kam Jones, Cormac Ryan, Marcus Garrett, Cameron Parker and Ty Berry. Jordan’s physicality and rebounding would be evaluated alongside, not instead of, the primary creators.

03 / DEFEND - SECURE - CONNECT

DEFEND	Pressure the ball, compete through screens and disrupt the action.
SECURE	Box out, rebound and prevent a second-chance possession.
CONNECT	Move the ball into the next advantage with minimal usage.

04 / WHY JORDAN & DEPLOYMENT

Mar. 22, 2025 vs Rip City: 14 assists, nine rebounds, five steals.
Combined 2024-25 G League AST/TO: 2.41.
Pair Jordan with a scoring guard for defensive assignments, rebounding responsibility and fast next-action passing.

05 / FILM & NEXT STEP

Review three complete possessions: defensive action, rebound, next pass.

PROPOSED EVALUATION

Assess the possession-winning guard role within Wisconsin’s rotation.
If the role translates on film, consider a targeted workout.
