J2 / FRONT OFFICE INTELLIGENCE

TEXAS LEGENDS

JORDAN LATHON - EXECUTIVE SCOUTING BRIEF

6'5" GUARD | POINT-OF-ATTACK DEFENSE | REBOUNDING | SECONDARY CREATION

14-22	113.6	117.3	119.7
2025-26 RECORD	PPG / 23RD	OFF RTG / 27TH	DEF RTG / 9TH

01 / TEAM HYPOTHESIS

Texas finished 14-22; its offense ranked 27th, its defense ninth in 2025-26.
Jordan's case: protect possessions and support creators without high usage.
Nov. 8 opener: a 107-91 loss to Mexico City; one game is not a season trend.

02 / CURRENT BACKCOURT

Nov. 6 roster: 13 players with three Dallas two-ways: Clayton Jr., Howard, Lawal.
Other perimeter options: Flagler, Floyd, Green Jr., Lundy and Cross.
Cross was the only player to appear for Texas last season, per team release.
Dallas recalls can change lineups but do not open standard roster slots by themselves.

03 / WHERE JORDAN CONTRIBUTES

CONNECT / Move the ball to the second side after the first advantage.
DEFEND / Take physical point-of-attack assignments beside scoring guards.
REBOUND / Finish stops and create the next transition chance.

04 / WHY JORDAN & THE DEPLOYMENT

Mar. 22, 2025 vs Rip City: 14 assists, nine rebounds and five steals.
Combined 2024-25 G League assist-to-turnover ratio: 2.41.
Pair Jordan with Clayton, Flagler or Howard as a low-usage second unit connector.
Evaluate full possession film: screen navigation, rebounding and fast decisions.

05 / FILM & NEXT CONVERSATION

Three possessions: POA defense, finishing the stop and secondary playmaking.
Basketball contacts: coach Nate Mitchell; GM Terry Sullivan; assistant GM Ofomata.

THE ASK

Review Jordan as a physical, low-usage backcourt connector.
If the role fits and a roster pathway develops, discuss a targeted workout.
